FOR SALE—A desirable residence property in west end. Nice lawn and shade trees. Price \$1,100. Inquire of Butler Buchanan.

O. H. Swingley, of the Union Pacific land department, has been in this section for a week or so presumably on a "fishing" expedition. There are those who are so unkind as to say that Mr. Swingley is here for the purpose of fishing for facts with which to strengthen the company's petition in the suit which the county has begun for the collection of back taxes.

Prices that argue stronger than words, Bon Bon French Underwear, made coat shaped so it fits well, price fifty cents a garment. Best twenty-five cent undershirt or drawers in the city for the money. STAR CLOTHING HOUSE.

To the heat frizzled individual there isn't much comfort in scanning the weather record of July for years past. The average temperature for the month soon to break upon us is seventy-three degrees, which means a whole lot of mighty warm weather. The hottest July day we have ever had was July 5, 1877, when the mercury hopped up to 107. But as North Platte was a hot town at that time and had hot Fourth of July celebrations, it is not strange that the day following the Fourth should be hot.

here. The doctor says we eat too much meat and grease and not enough fruit.

The crops in this community have made wonderful progress in the last week, especially corn. It will hustle the farmers to get over their corn the third time. South of town they have made a machine for catching grasshoppers and are working it with great success.

## ANOTHER PROPHECY.

The Conservative: In his speech at Hornellsville, N. Y., Aug. 25, 1896, Mr. Bryan thus declaimed against the gold standard: "They know the gold standard encourages the hoarding of money, instead of expanding it in the development of the resources of the country. And now this policy of hoarding is driving thousands, and hundreds of thousands of workingmen out in the streets, where they beg for the privilege of working for their daily bread."

It was not the gold standard that created the conditions to which he referred, but the fear of repudiation and depreciation drove capital from the usual channels of investment. If there was any doubt about this at the time it has been removed by later events. The defeat of Mr. Bryan, the consequent restoration of public confidence in our financial integrity brought the gold from hiding and employed it "in developing the resources of the country" and thus gave employment to labor.
